

2020-2021 ANNUAL REPORT

Lambton Elderly Outreach April 20, 2022

Message from the CEO and Board Chair

In the 2020-2021 fiscal year, our Lambton Elderly Outreach team worked hard to "steady the ship" after experiencing a significant growth spurt, the previous year. We are proud of our accomplishments, especially during such unpredictable times as we constantly adapted to the ever changing environment that each round of COVID presented us with.

We began the New Year, with an immediate expansion. In March 2020, we partnered with a fifth retirement home to continue providing essential care to residents while the home was

in a COVID-19 outbreak. We have worked closely with our retirement home partners to pull together human resources during very trying times, always keeping the client care needs top of mind and in our hearts, to reduce any further burden or isolation they were exposed to during COVID. We are proud of our Home Support Services for going above and beyond in many circumstances to meet these needs.

We also continued to provide transportation to local residents for medical needs, sometimes as the only local provider during active outbreaks. We tooled up our vehicles to create a fleet that has COVID safety precautions for staff and clients. Our Meals on Wheels grew exponentially as LEO partnered with The County of Lambton to provide nutritious meals to their Housing Program's tenants and clients. Hats off to our Community Support Services who took great pride in delivering a critical community service during these uncertain times.

In March 2021, LEO updated our Organizational Structure, in response to changes related to Sr. leadership departures. The 4 existing Directors were reduced to 3 Directors, and the Retirement Home Support Program, Crisis Intervention program as well as the Acquired Brain Injury program were aligned under one Director of Clinical Services.

LEO has been faced with the challenge of getting our fiscal year reporting back on track and this year, we expect will be the last delayed AGM. This has been time well spent to update important practices and processes to put LEO in good stead for the future years.

LEO is the sponsor of the Age Friendly Sarnia designation, and are working closely with the community partners on further enhancing our community's environment and services to meet a standard set out by the World Health Organization. We are also working closely with partners, specifically Lambton Public Health and Lambton College, to create Age-Friendly Best Practices for Business and Service Providers E-Learning Certificate Course.

Sarnia Lambton Ontario Health Team (OHT) is now down a path that we are beginning to collaborate and make collective decisions for the betterment of our entire community vs agency specific. There is so much opportunity ahead, and LEO has a vital role as a SL OHT member, for both Home and Community Support Services. There is lots of work ahead of us, and LEO is committed to building trusting relationships that will result is a new and better healthcare and social service model for our Sarnia Lambton community.

The LEO Board of Directors would like to thank each of our clients, staff members, volunteers, and partners for working together to ensure LEO's success through such a prolonged, world health crisis. We are extremely proud of the services LEO provides to our valued clients each and every day. We will continue to make strides to ensure LEO remains relevant and present to service our communities well into the future.
